

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Experiment -8

Student Name: Lovyansh Dhanraj

Branch: BE-CSE

Semester: 6th

Subject Name: Project-Based Learning in
Java with Lab

UID: 22BCS17264

Section/Group: NTPP-DL_901/B

Date of Performance: 17/03/2025

Subject Code: 22CSH-359

7.1.1.Aim: To develop a servlet that accepts user credentials from an HTML form and displays a personalized welcome message on successful login.

7.1.2 Objective: Learn form handling with Servlets

Understand HTTP request/response handling

Practice doPost() method

7.1.3 Code:

```
<!DOCTYPE html>
<html>
<head><title>Login</title></head>
<body>
  <form action="LoginServlet" method="post">
    Username: <input type="text" name="username"><br>
    Password: <input type="password" name="password"><br>
    <input type="submit" value="Login">
  </form>
</body>
</html>
```

```
import java.io.*; import
javax.servlet.*;
import javax.servlet.http.*;
```

```
public class LoginServlet extends HttpServlet {
    protected void doPost(HttpServletRequest request, HttpServletResponse response)
    throws ServletException, IOException {
        String user = request.getParameter("username");
        String pass = request.getParameter("password");

        response.setContentType("text/html");    PrintWriter out
        = response.getWriter();

        if ("admin".equals(user) && "1234".equals(pass)) {
```

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

```
        out.println("<h2>Welcome, " + user + "!</h2>");
    } else {
        out.println("<h2>Login Failed. Invalid credentials.</h2>");
    }
}
}
</web-app>
<servlet>
    <servlet-name>LoginServlet</servlet-name>
    <servlet-class>LoginServlet</servlet-class>
</servlet>
<servlet-mapping>
    <servlet-name>LoginServlet</servlet-name>
    <url-pattern>/LoginServlet</url-pattern>
</servlet-mapping>
</web-app>
```

Output:

- 1) On correct login: Welcome, Raja !
- 2) On failure: Login Failed. Invalid credentials.

7.2.1 Aim: To build a servlet integrated with JDBC that displays all employees and enables search by employee ID.

Objective:

- 1) Use JDBC with Servlet
- 2) Fetch and display records
- 3) Implement search functionality

7.2.2 Code:

```
<!DOCTYPE html>
<html>
<head><title>Search Employee</title></head>
<body>
    <form action="EmployeeServlet" method="post">
        Enter Employee ID: <input type="text" name="empId">
        <input type="submit" value="Search">
    </form>
</body>
</html>
```

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

```
import java.io.*; import
javax.servlet.*; import
javax.servlet.http.*; import
java.sql.*;

public class EmployeeServlet extends HttpServlet {
    protected void doPost(HttpServletRequest request, HttpServletResponse response)
    throws ServletException, IOException {

        String      empId      =request.getParameter("empId");
        response.setContentType("text/html");  PrintWriter  out  =
        response.getWriter();

        try {
            Class.forName("com.mysql.jdbc.Driver");
            Connection con =
            DriverManager.getConnection("jdbc:mysql://localhost:3306/company", "root", "password");

            String query = "SELECT * FROM employees WHERE emp_id=?";
            PreparedStatement ps = con.prepareStatement(query);
            ps.setString(1, empId);          ResultSet
            rs = ps.executeQuery();

            if (rs.next()) {
                out.println("<h2>Employee Details</h2>");          out.println("ID: "
+ rs.getInt(1) + "<br>");          out.println("Name: " + rs.getString(2) +
"<br>");          out.println("Department: " + rs.getString(3));
            } else {
                out.println("No employee found with ID " + empId);
            }

            con.close();          } catch
            (Exception e) {
                out.println("Error: " + e.getMessage());
            }
        }
    }
}
```

7.2.3 Output:

- 1) Enter an employee ID → Shows details if found.
- 2) Not found → "No employee found with ID X"

DEPARTMENT OF

COMPUTER SCIENCE & ENGINEERING

7.3.1 Aim:

To develop a JSP-based student portal that accepts attendance data and saves it to the database using aservlet.

Objective:

- 1) Combine JSP for UI and Servlets for logic
- 2) Perform INSERT using JDBC
- 3) Build a real-world web flow

Code:

```
<% @ page language="java" %>
<html>
<head><title>Student Attendance</title></head>
<body>
  <h2>Mark Attendance</h2>
  <form action="AttendanceServlet" method="post">
    Roll No: <input type="text" name="roll"><br>
    Name: <input type="text" name="name"><br>
    Status: <select name="status">
      <option>Present</option>
      <option>Absent</option>
    </select><br>
    <input type="submit" value="Submit">
  </form>
</body>
</html>
```

```
import java.io.*; import
javax.servlet.*; import
javax.servlet.http.*; import
java.sql.*;
```

```
public class AttendanceServlet extends HttpServlet {
    protected void doPost(HttpServletRequest request, HttpServletResponse response) throws
    ServletException, IOException {        String roll = request.getParameter("roll");
        String name = request.getParameter("name");
        String status = request.getParameter("status");

        response.setContentType("text/html");
        PrintWriter out = response.getWriter();

        try {
```

DEPARTMENT OF

COMPUTER SCIENCE & ENGINEERING

```
Class.forName("com.mysql.jdbc.Driver");
Connection con =
DriverManager.getConnection("jdbc:mysql://localhost:3306/student_portal", "root", "password");

String query = "INSERT INTO attendance (roll_no, name, status) VALUES (?, ?, ?)";
PreparedStatement ps = con.prepareStatement(query);
ps.setString(1, roll);      ps.setString(2, name);
ps.setString(3, status);

int i = ps.executeUpdate();      if
(i > 0) {
    out.println("<h3>Attendance marked successfully for " + name + "!</h3>");
}

con.close();
} catch (Exception e) {
    out.println("Error: " + e.getMessage());
}
}
}
```

```
CREATE TABLE attendance (
    id INT AUTO_INCREMENT PRIMARY KEY,
    roll_no VARCHAR(20),    name
    VARCHAR(100),
    status VARCHAR(10)
);
```

OUTPUT

Form submission → "Attendance marked successfully for John!" And the data is stored in the database.
